# The Cyberinfrastructure Landscape: Systems, Providers, Technologies

└ Who am I? (Who are any of us, really?)

x

Who am I? (Who are any of us, really?)

## Back in the day

- ▶ ME student at a medium-sized public STEM-ish university who should have studied more instead of helping people do things in computer labs.
- ▶ Sysadmin/CAD/FEA co-op student at Oak Ridge National Lab before SGI Irix got its cameo in "Jurassic Park" ("It's a Unix system: I know this!").

Figure 1: Some skinny nerd, 1990

2024-06-25

# The Cyberinfrastructure Landscape: Systems, Providers, Technologies

└ Who am I? (Who are any of us, really?)

x

Who am I? (Who are any of us, really?)

## Now

- ▶ Three ME degrees from the now-R2 university (1995, 1998, 2018)
- ▶ Mostly-solo practitioner of all things RCD at the same university (2000-2017, 2017-)
- ▶ Perpetually online member of multiple RCD organizations (2018-)
- ▶ Member of Campus Champions Leadership Team (2022-)
- ▶ Compulsive advice-giver

Figure 2: Same nerd, not remotely skinny, 2023

└ Computational and/or Storage Resources

└ National Science Foundation

└ Stampede3 at Texas Advanced Computing Center (TACC)

x

Stampede3 at Texas Advanced Computing Center (TACC)

- ▶ 20 Intel Sapphire Rapids nodes each with 4 Intel GPUs, 128 GB HBM
- ▶ 560 Intel Sapphire Rapids nodes (no GPUs), 128 GB HBM
- ▶ 1060 Intel Skylake nodes, 192 GB RAM
- ▶ 234 Intel Ice Lake nodes, 256 GB RAM
- ▶ 10 PB VAST (88CRATOS) + 1 TB Lustre (88Q8X)
- ▶ 100 Gb Omni-Path networking
- ▶ Intended for:
  - ▶ parallel applications scalable to 10,000+ cores
  - ▶ general purpose computing
  - ▶ throughput computing

x

Delta at National Center for Supercomputing Applications (NCSA)

- ▶ All using AMD 7763 CPUs
- ▶ 132 nodes with 128 cores and 256 GB RAM
- ▶ 100 nodes with 64 cores, 256 GB RAM, and 4 NVIDIA A40 CPUs
- ▶ 100 nodes with 64 cores, 256 GB RAM, and 4 NVIDIA A100 GPUs
- ▶ 6 nodes with 128 cores, 2048 GB RAM, and 8 NVIDIA A100 GPUs
- ▶ 1 node with 128 cores, 2048 GB RAM, and 8 AMD MI100 GPUs
- ▶ 6 PB Lustre for \$80NE and \$8CRATOS
- ▶ 200 Gb HPE/Cray Slingshot networking

└ National Science Foundation

└ ACES at Texas A&M University

ACES at Texas A&M University

- ▶ 130 nodes, 11888 cores
- ▶ Mostly Intel Sapphire Rapids, some Intel Ice Lake, Intel Cascade Lake, and AMD Rome
- ▶ Tons of mostly-composable accelerators:
  - ▶ GPUs: NVIDIA H100 and A30, Intel (coming soon)
  - ▶ FPGAs: Bittware Agiles, Intel D5005
  - ▶ Coprocessors: NaoSilicon
  - ▶ Optane memory modules
- ▶ Non-composable accelerators:
  - ▶ Graphcore IPUs: GC200, Bore-2000
  - ▶ NEC Vector Engine: Type 20B-P
- ▶ 2.3 PB Lustre
- ▶ 200 Gb Infiniband networking

└ Multi-tier Assistance, Training & Computational Help (MATCH)  
Plus

x

Multi-tier Assistance, Training & Computational Help (MATCH) Plus

## MATCH Plus:

- takes requests from researchers with a support need,
- identifies a student and mentor that can provide that support,
- connects the researcher to the student and mentor with regular meetings and updates,
- for 5–10 student hours and 2–3 mentor hours per week for 3–6 months,
- at no charge.

└ Multi-tier Assistance, Training & Computational Help (MATCH)  
Premier

x

## MATCH Premier:

- takes requests from already-funded projects,
- identifies an expert consultant and arranges payment,
- for a 6-12 month period.

└─ Engagement and Performance Operations Center (EPOC)

└─ Engagement and Performance Operations Center (EPOC)

x

*EPOC provides researchers with a holistic set of tools and services needed to debug performance issues and enable reliable and robust data transfers. By considering the full end-to-end data movement pipeline, EPOC is uniquely able to support collaborative science, allowing researchers to make the most effective use of shared data, computing, and storage resources to accelerate the discovery process.*

# The Cyberinfrastructure Landscape: Systems, Providers, Technologies

x

Science Gateways

*[Science g]ateways are online interfaces that give researchers, educators, and students easy access to shared resources that are otherwise inaccessible or unaffordable for a large segment of the scientific community.*

....  
*The SGCI was founded to provide services and resources that advance the state of the art in science gateways, that help gateway creators use accepted practices in developing and operating gateways, and that catalyze the formation of a community that may be diverse in discipline but has a common need to advance science through gateways.*

└ OpenHPC

└ OpenHPC

x

OpenHPC

*OpenHPC is a Linux Foundation Collaborative Project whose mission is to provide a reference collection of open-source HPC software components and best practices, lowering barriers to deployment, advancement, and use of modern HPC methods and tools.*

*OpenHPC components and best practices will enable and accelerate innovation and discoveries by broadening access to state-of-the-art, open-source HPC methods and tools in a consistent environment, supported by a collaborative, worldwide community of HPC users, developers, researchers, administrators, and vendors.*
